

Amsterdam Drone Week EASA conference

Amsterdam Drone Week is the global platform for sharing knowledge on current air solutions, potential innovations and vital regulations. A top-level meeting point where all key players, big and small, commercial and non-commercial, from various industries, knowledge institutes and authorities, gather to co-create and co-operate. Creating urban air solutions together.

ADW 22 took place in Amsterdam Netherlands from 29 to 31 March. ADACORSA representatives listened to presentations at Main Stage, and XPERT Theater, and participated in break out rooms, workshops and a tour of Unmanned Valley. Representatives from Metis Baltic also participated in EASA High-Level Conference on Drones, which took place at the same time. Project representatives took advantage of all networking opportunities and formed meaningful connections with potential stakeholders.

ADACORSA is determined to become a partner at Amsterdam Drone Week 2023 and present its achievements and developments at the project booth and on stage.

UPCOMING EVENTS

HiPEAC 2022

HiPEAC 2022 will take place in Budapest, Hungary from 20 to 22 of June.

The HiPEAC conference is the premier European forum for experts in computer architecture, programming models, compilers, and operating systems for general-purpose, embedded, and cyber-physical systems. Areas of focus and integration include safety-critical dependencies, cybersecurity, energy efficiency, and machine learning.

This project received funding from the ECSEL Joint Undertaking (JU) under grant agreement No 876019. The JU receives support from the European Union's Horizon 2020 research and innovation programme and national authorities

Aerospace Tech Week

AEROSPACE TECH WEEK took place on 3-4th November 2021 in Toulouse, France. TTTech Aerospace team participated in this event presenting solutions for safety-critical applications. Dr Mirko Jakovljevic in his presentation highlighted the capabilities of Ethernet-based Networking Protocols for the next generation Integrated Modular Avionics in UAV / UAM.

300+ airlines, 1500+ OEMs and 150+ global technology suppliers participated in Aerospace Tech Week conference sessions and took advantage of available networking opportunities.

Partner meeting in Lisbon

ADACORSA partners developing authority and control hand-over capability between Beyond Visual Line of Sight ground control stations met on the 12th of November in Lisbon to discuss integration, the concept of operations, scenarios, and systems architecture for the flight's experiments to happen in 2022. Representatives from Embraer and AnyWi Technologies participated in this meeting.

PROJECT UPDATES:

2nd ADACORSA Review Meeting

2nd Review Meeting for the project will take place on the **21st of June in Brussels, Belgium** at KDT JU, White Atrium Building.

Due to restrictions associated with a global pandemic, this will be the first in-person review meeting of the project. Yet, some restrictions still apply and only one representative per Work Package or Supply Chain leader will be allowed. The rest of the partners will join online.

In this meeting, Project Officer Alicia Fernandez del Viso together with outside experts Zlatko Petrov and Alicia Fernandez will evaluate the progress made by the consortium in the 2nd year.

In preparation for the meeting consortium partners met in Graz, Austria for the 2nd General Assembly Meeting. The meeting was organised by Infineon Technologies Austria AG and allowed partners to meet in person for the first time and receive valuable feedback on their progress presentations.

EF ECS 2020

EF ECS is the international forum to 'Create impact by collaborative innovation!' for an autonomous and sustainable Europe along with the Electronic Components and Systems value chain in Europe. EF ECS 2021 took place on the 23-25th of November 2021 online, on a novel digital platform.

ADACORSA project was represented in the digital booth and digital marketplace. The Digital booth provided solutions for uploading the project`s dissemination material and booking a meeting with the project`s representative. Dissemination and Communication Managers were present at the booth, ready to answer about the project.

During this conference, multiple project partners were present and actively networking on the project`s behalf. Some of the partner representatives can be seen in the "Team" section in the image below.

Participation in this event was very valuable to the project and the team. Presented topics and discussions provided a glimpse into future technologies, RD&I challenges and priorities for the short and long term. Also familiarizing oneself with other innovation projects sparked ideas on improving ADACORSAS`s project. Not to mention all the networking opportunities!

Technical Alignment Meeting:

Technical Alignment Meeting took place from 16th to 17th of February on Webex online meeting platform.

During the meeting, Supply Chain leaders presented developments, discussed future actions and answered questions. This meeting is essential to align supply chains in preparations for the upcoming 2nd Review Meeting in June.

Article on gender gap in STEM

ADACORSA coordinator Ulrike Glock, together with Cristina De Luca and Thomas Gutt from project partner Infineon Technologies discussed what can be done to reduce the gap.

Their insights can be found in Industry calls for a multi-level approach to tackle STEM gender gap.
